

Instructions for Authors

Annals of Allergy, Asthma & Immunology

Editor-in-Chief: Gailen D Marshall, MD PhD

Managing Editor: Kimberly K Stamper

Mission Statement

The *Annals of Allergy, Asthma & Immunology* is a scholarly medical journal published monthly by the American College of Allergy, Asthma and Immunology. The purpose of the *Annals* is to serve as an objective, evidence-based forum for the allergy/immunology specialist to keep up-to-date on current clinical science (both research and practice-based in the fields of allergy, asthma, and immunology). The emphasis of the journal will be to provide clinical and research information that is readily applicable to both the clinician and the researcher. Each issue of the *Annals* shall also provide opportunities to participate in accredited, continuing medical education activities to enhance overall clinical proficiency.

Inquiries regarding the editorial management of the *Annals* or questions or form submissions relative to manuscripts submitted for publication should be sent to:

The Annals of Allergy, Asthma & Immunology

Editorial Office

2500 North State Street, Suite N416

Jackson, MS 39216

Telephone: (601) 815-4871

Fax: (601) 815-4770

Email: annallergy@medicine.umsmed.edu

Authors are responsible for all statements, opinions, conclusions, and methods of presenting their data in articles submitted to the *Annals of Allergy, Asthma & Immunology* for possible publication. **The views of authors as presented in their articles do not necessarily represent the opinions of the *Annals of Allergy, Asthma & Immunology* editorial staff or the American College of Allergy, Asthma and Immunology.**

Instructions for Authors

The purpose of these instructions is to provide authors with clear and concise guidelines for preparing a manuscript in acceptable *Annals* style. In general, exceptions to the published guidelines are not made. Authors who believe they have compelling reasons to alter and/or exceed the published guidelines may appeal to the editorial office for a variance **PRIOR TO** submission. Appeals may be sent to annallergy@medicine.umsmmed.edu. Otherwise, manuscripts that do not meet these guidelines will be returned to the submitting author for revision prior to any further consideration for peer review.

Manuscript Submission

To submit a manuscript, access the *Annals of Allergy, Asthma & Immunology* via the Internet at www.annallergy.org. Click on “Submit article to Annals.” Only manuscripts submitted through this medium will be considered for review. At the time of submission, complete contact information (mailing address, telephone number, fax number and e-mail address) for the corresponding author is required. First and last names, abbreviated-highest academic degrees, e-mail addresses, and institutional affiliations of all co-authors are also required. **NOTE:** The following items are **required** at the time of submission: a cover letter, title page, text file, references, and a completed authorship form for each author. If the article type is a “CME Review” the following items are required in addition to those stated above: CME Questions, Disclosure of Faculty Interests or Affiliations form for each author, and an Honorarium form.

Article Types

The *Annals* publishes original articles, reviews, case reports (by invitation only), editorials, letters, correspondence and many other categories of articles. Topics of interest include all subjects that relate to the practice of allergy-immunology. The most frequent published types are described herein.

Original Articles

Original articles should have a structured abstract with the following headings: Background, Objective, Methods, Results and Conclusions, a minimum of 3 keywords for indexing, and no more than 50 references. Text should not exceed 3,000 words and should be organized into the following sections: Introduction, Methods, Results and Discussion.

Review Articles

Review articles address a specific question or issue that is relevant for clinical practice and provide an evidence-based, balanced, patient-oriented review on a focused topic, either clinical or basic science. Review Articles should have a structured abstract with the following headings: Objective, Data Sources, Study Selections, Results and Conclusion, a minimum of 3 keywords for indexing, and no more than 50 references. Text should not exceed 3,000 words and should be organized into the following sections: Introduction, Body, Discussion and Conclusions. Because of space concerns, authors interested in submitting a review article should submit a brief description to the Editor-in-Chief to determine interest via e-mail **PRIOR TO** submitting a full manuscript.

CME Review Articles

CME Review articles, offered as part of a Continuing Medical Education endeavor, must include a minimum of 5 multiple-part questions, with five answers each, related to the material in the review article. CME Review articles should have a structured abstract with the following headings Objective, Data Sources, Study Selections, Results and Conclusion, a minimum of 3 keywords for indexing, and no more than 50 references. Text should not exceed 4,000 words and should be organized into the following sections: Introduction, Body, Discussion and Conclusions. In addition to Authorship forms, CME Review articles require all authors read and sign an original Disclosure of Faculty Interests of Affiliations form at the time of submission. This form is available online at <http://www.editorialmanager.com/annallergy/>.

Case Reports

Case Reports will only be considered for publication in the Letters category.

Letters

Letters replace the more traditional “Case Reports” with a more condensed format and serve as the primary means for an author to communicate brief clinical observations to our readership. Letters should not begin with the salutation “To the Editor”, and are limited to 750 words, one figure OR table, and 8 references.

Correspondence

Correspondence are brief opinions about recently published articles in the *Annals* and other current topics of general interest to our readership. Correspondence may or may not have a response, should begin with the salutation “To the Editor” and is limited to 400 words, and 5 references. Figures and tables are not allowed for this category. Correspondence submissions are reviewed in the Editorial Office and do not undergo outside peer review. Correspondence discussing a recently published *Annals* article will generally be considered only if it is received within 2 months of the article's publication date. Exceptions to this policy must have the approval of the editor-in-chief. The previously published article should be cited in the text.

Perspectives

On occasion, important topics of general interest to the readership are identified that warrant commentary by a specific expert. The Editor-in-Chief will invite such an expert to write commentary on a specific topic. There is no structured abstract and the text should not exceed 2,000 words and 20 references. Because of space constraints, unsolicited Perspective manuscripts will not be considered.

Editorials

Guest Editorials are solicited by the Editor-in-Chief or Associate Editors to accompany certain special articles, CME review articles, and original articles that are published in the *Annals*. Text should not exceed 750 words and 10 references. Guest Editorials should reference the previously published article in the *Annals*. Unsolicited editorials will not be considered.

Book Reviews

Short reviews of recently published books of central interest to our readers are published only by invitation from the Editor-in-Chief. Books for review should be sent to the Annals Editorial Office located at University of Mississippi Medical Center, 2500 North State Street, N416, Jackson, MS 39216. Review text should not exceed 250 words and the review must include the title of the book, the author, publisher and address, edition and year of publication, availability in hard or soft copy, the number of pages, the price and ISBN #.

Editorial Policies for Authors

Authorship

It is assumed that a submitted manuscript is the work of the listed authors and represents the effort (data generation, accumulation and interpretation with subsequent manuscript writing) to generate the manuscript. While outside editorial assistance may be utilized, “ghost written” articles are not accepted for review by the *Annals*. By submitting a manuscript the authors certify that they have (collectively) personally written at least 80 percent of the manuscript.

Authorship credit should only be given when at least three of the following criteria are met: (1) conception and design of the study; (2) data generation (when applicable); (3) analysis and interpretation of the data and (4) preparation or critical revision of the manuscript. Additionally all authors must approve the final version of the manuscript. **If there are more than 5 authors, the contribution of each author must be substantiated on the title page.** Authors may insert a footnote on the title page to explain the order of authorship and the specific contribution of each author. Assistance of other participants in a study may be indicated as an acknowledgment if the authors have written permission from each person listed in the acknowledgment. On request, the authors must provide the data on which the manuscript is based for examination by the editor or reviewers assigned by the editor. Authors are responsible for all statements, opinions, conclusions, and methods of presenting their data in articles submitted to the *Annals of Allergy, Asthma & Immunology* for possible publication. The Authorship form is available online at <http://www.editorialmanager.com/annallergy/>.

Clinical Trial Registration

All manuscripts that present therapeutic data involving a pharmaceutical agent (commercial or non-commercial) must be registered with an approved Registry that meets the minimum registration data set as described by the International Committee of Medical Journal Editors (ICJME). The minimum registration data set can be viewed at <http://www.icmje.org/icmje.pdf>. Approved Registries include those listed below.

- (1) www.clinicaltrials.gov
- (2) <http://isrctn.org>
- (3) www.umin.ac.jp/ctr/index/htm
- (4) www.actr.org.au
- (5) www.trialregister.nl

The **Registry URL** and **assigned database number** should be clearly identified on the title page and recorded during the electronic submission process.

Corresponding Author

If the manuscript is accepted, the corresponding author will serve on behalf of all coauthors as the primary correspondent with the editorial office, will receive electronic versions of the page proofs for their articles from Cadmus Professional Communications, and agrees to make only necessary changes and return the corrected page proofs to Cadmus within **3** business days of electronic receipt.

Conflict of Interest

A conflict of interest may exist when an author (or the author's institution or employer) has financial or personal relationships that could potentially influence (or bias) the author's decisions, work, or manuscript. All authors are required to report potential conflicts of interest, including specific financial interests relevant to the subject of their manuscript, in their cover letter, on the *Annals* Authorship form, and during the electronic submission process. Authors without relevant financial interests in the manuscript should indicate no such interest. These conflicts of interest will be published in footnote form for all manuscripts accepted for publication by the *Annals*.

Funding/Support

All financial support for the research and the work should be clearly and completely identified on the title page and recorded during the electronic submission process.

Ethical Approval of Studies and Informed Consent

For all research studies involving human subjects or research material derived from humans, appropriate institutional review board review and approval is required and should be stated in the Methods section of the manuscript. The *Annals* will not publish human research which has not undergone IRB review. For investigations involving human subjects, the manner in which informed consent was obtained from the study participants (i.e., oral or written) should also be so stated in the Methods section of the manuscript. Institutional review board approval and informed consent statements are not required for Case Reports. Studies exempted from IRB approval by their respective boards should be so indicated in the methods section. Failure to comply with this requirement will result in the manuscript being returned without review.

Reproduced Materials

When previously published figures or tables are used, the author must obtain written permission from the copyright holder (usually the publisher) to reproduce the material in print and online. An appropriate credit line should be included in the figure legend or table footnote, and full publication information should be cited in the reference list. Letters of permission must accompany the submission.

Revised Manuscripts

Submitted manuscripts may be returned to authors with request for revision. A revised manuscript should be received within **one month** of the date of the decision letter and must include a point-by-point reply to all reviewer comments. As with new submissions, revisions must be electronically submitted through the online manuscript submission and peer review system. Follow the instructions in the Author Tutorial (located on the home page) for submitting a revised manuscript. **Manuscript revisions should be highlighted and/or underlined in red.** The original text limits (word count, references, tables/figures) are still in effect. If the revision exceeds these limits, it will be your responsibility to fully explain why the revision cannot be

edited to comply with the limits. This explanation should be provided in your response to the reviewers. **Note:** A revised manuscript not returned within one month of the date of the decision letter will automatically be rejected. Any further action will require an entire new submission process. Extensions to this deadline will be provided in extenuating circumstances and requires the prospective approval of the Editor-in-Chief.

Editorial Review and Publication

Corresponding authors are sent notifications of the receipt of manuscripts and editorial decisions by e-mail. Authors can check the status of their submitted manuscript, during the review process, via the online manuscript submission and peer review system.

Editing

Accepted manuscripts are edited in accordance with the *American Medical Association Manual of Style*, 10th ed. New York: Oxford Press; 2007 and returned to the corresponding author for approval. Edited manuscripts should be returned to Copy Edit within **5** business days. If return of edits are delayed, your manuscript will be sent to page proofing, as edited, without your approval.

Proofs

Corresponding authors will receive electronic versions of the page proofs for their articles from Cadmus Professional Communications. Authors should make only necessary changes and return the corrected page proofs to Cadmus within **3** business days. If return of page proofs are delayed, the manuscript may at the discretion of the Editor-in-Chief be accepted for publication as is. Accurate proofreading and clear marking of corrections are essential for the production of a quality article. **Please note that careful proofreading is solely your responsibility. Errata are generally not published for this oversight unless the error is significant.** Five alterations on the page proofs are allowed without cost to the author. Additional changes, not including printer errors, will be billed directly to the author at the current cost, and are subject to approval by the *Annals* editorial staff.

Reprints

The *Annals of Allergy, Asthma & Immunology* provides high quality reprints to its authors and the public.

For commercial reprints please contact:

Editorial and Peer Review

Manuscripts are initially reviewed by the *Annals* Editor-in-Chief. Manuscripts with insufficient priority for publication are declined and returned to the authors. Other manuscripts are assigned to an Associate Editor and sent to expert consultants for peer review.

Manuscript Preparation and Submission Requirements

Manuscripts that do not adhere to the following requirements will be returned to the corresponding author before peer review is initiated.

Basic Formatting (Page Setup/Fonts)

Manuscripts should be prepared in accordance with the “Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication” (<http://www.icmje.org/icmje.pdf>) updated October 2007. The entire manuscript should be in a standard font such as Times New Roman, Arial, or Courier, size 12. Each manuscript component should be attached as a separate submission item, be double-spaced and have a one inch margin on all sides. Page numbering should begin with the manuscript file. The page number should appear in the upper right corner of each page. Line numbers (i.e., 1, 2, 3 etc.) should be displayed in the left-hand margin of the manuscript file. Line numbering can be added from the File/Page Setup menu of word processing programs and should be continuous throughout the manuscript file. Do not restart numbering from each page. File names should not contain brackets [].

Article Lengths

Authors **must** comply with text limits that have been established for each type of article. Articles of excessive length require **prior** approval from the Editor-in-Chief.

To estimate the number of printed pages that a manuscript will require, use the following guidelines:

- Body of the manuscript: Estimate one printed page for every 750 words of text, which is approximately 3 pages in double-spaced, 12-point Courier or Times New Roman font.
- References: Estimate one-half of a page for every 25 references.

- Tables and figures: Estimate one-fourth of a page for each 3”x 4.5” table or figure (or part of a multipart figure) plus legend.
- The printable area of a page in the *Annals* measures 6” wide by 9” long. Graphic presentations must be sized to one (3”) or two (6”) column widths.

Manuscript Components

Each submission must be comprised of the following submission items, *unless otherwise specified*. **Each component should be attached as a separate submission item in the following order:** a cover letter, title page, text, acknowledgments, references, a completed Authorship form for each author, and as appropriate tables, figures and figure legends, CME Questions, Disclosure of Faculty Interests or Affiliation form, and Honorarium form.

Cover Letter

A cover letter, including complete contact information for the corresponding author (mailing address, telephone number, fax number and e-mail address) and potential conflicts of interest should be submitted with each article type.

Title Page

The title page should be concise and easy to read. Each author who meets authorship criteria should be listed, including the Author’s full name, abbreviated-highest academic degree, and institutional affiliation. The name, mailing address, telephone number, fax number, and e-mail address of the author responsible for correspondence should also be noted. If there are more than 5 authors, the contribution of each author must be substantiated on the title page in context of the authorship criteria identified in the Editorial Policies for Authors section of this document. The source of any financial support should also be included on the title page. A word count for the text only (excluding table footnotes and figure legends) and the number of figures and tables accompanying the manuscript should be specified. Authors may also add on the title page a footnote to explain the order of authorship.

Text

In order to ensure a double-blind review, it is imperative that author identifying information not be included in the manuscript text. **Abstracts, references, and figures should not be included in the text file. If applicable, tables should be included at the end of the text file.** The text of the manuscript should be divided into sections with the following headings in this order, *unless otherwise specified in Article Types*.

Introduction: Provide an overview of the scope and relevance of the study.

Methods: Describe the design (randomized, double-blind, placebo control), subjects, setting (general community, private practice, and hospital), interventions, and main outcome measures. For all research studies including human subjects (excluding Case Reports) the specific IRB that has approved the research must be indicated. Additionally a statement that informed consent was obtained from all research participants must be included. Both should be clearly noted and, upon request, must be made available to the Editor-in-Chief for review. If clinical trials were used, a statement of registration is required also.

Results: Describe the experimental data and results as well as the particular statistical significance of the data.

Discussion: Provide and quantify the main outcomes of the study. Identify limitations of the presented data including plausible explanations for discrepancies between the data and the literature, any differences not expected from the initial hypothesis presented in the introduction and a measured description of the conclusions of the study with implications for future research, biological understanding and/or clinical applications.

For guidance regarding grammar, punctuation, and scientific writing see the *American Medical Association Manual of Style*, 10th ed. New York: Oxford Press; 2007.

Abbreviations

Avoid using acronyms and abbreviations except for tests or procedures better known by their abbreviation than by the full term, such as VDRL. Expand all abbreviations at first mention. Abbreviate units of measurement only when they appear with numerals (“measured in centimeters” but “87 cm”). Abbreviations may be used in figures and tables, but such abbreviations must be explained in the figure legend or a footnote to the table.

Units of Measure

Authors should express all laboratory values in conventional units with Systeme Internationale (SI) units included in parentheses after the conventional units. For those components with a conversion factor that is a multiple of 10, for example, cholesterol, aspartate aminotransferase, and the immunoglobulins, there is no need to dual report; use conventional units only. Use the degree Celsius for temperatures, metric mass units for drug dosages, and mm Hg for blood pressure and blood gas tensions. Conversion equations should be supplied as footnotes to tables and should be included in legends to figures. Conversion tables are available in the *American Medical Association Manual of Style*.

Names of Drugs

Use generic names for drugs except when a specific trade preparation was used in a study or involved in an adverse reaction or when unique properties of the proprietary drug require its identification.

Acknowledgments

Acknowledgments should be uploaded as a separate submission item and include the names, affiliations, and specific contributions of all persons who have contributed to the work reported in the manuscript (e.g., data collection, analysis, writing or editing assistance) but do not meet authorship criteria. In addition, the corresponding author must sign the Acknowledgment statement on the *Annals* Authorship form.

References

Authors are responsible for the accuracy and completeness of their references and format. Refer to the Article Types section of this document as there are a maximum number of references for each category. References should be recorded during the electronic submission process, uploaded as a separate submission item, and be numbered consecutively in the order in which

they are first cited in the text. In text, tables and legends, identify references with superscript Arabic numerals. For guidance regarding reference style, consult the National Library of Medicine (NLM) and abbreviate the names of journals according to Index Medicus. List all authors up to 6; if more than 6, list the first 3 followed by "et al." Try to avoid using abstracts as references. Unpublished observations, including personal communications, may not be included in the reference list but may be cited parenthetically in the text with the permission of the cited person, (e.g., Edward J. O'Connell, MD, unpublished data, 2003). Authors must indicate whether personal communications were written or oral. Articles or books accepted for publication but not yet published may be included as references with the name of the journal or publisher and the addition of "In press."

Example:

1. Macy E, Bernstein JA, Castells MC, et al. Aspirin challenge and desensitization for aspirin-exacerbated respiratory disease: a practice paper. *Ann Allergy Asthma Immunol.* 2007;98:172-174.
2. Li J, Lockey RF, Bernstein IL, Portnoy JM, Nicklas RA. Allergen immunotherapy: a practice parameter. *Ann Allergy Asthma Immunol.* 2003;90(suppl 1):1- 40.
3. Lieberman P, Kemp SF, Oppenheimer J, Lang DM, Bernstein IL, Nicklas RA. The diagnosis and management of anaphylaxis: an updated practice parameter. *J Allergy Clin Immunol.* 2005;115(suppl 2):S483-S523.

Authorship Form(s)

Completed authorship forms are required at the time of submission. Effective March 1, 2009, the editorial office will no longer accept authorship faxes. As a result, an authorship for each author must be completed by hand, scanned and uploaded at the time of submission. Each author must read and sign the statements on 1.) Authorship Responsibility, 2.) Financial Disclosure and 4.) Copyright Transfer. In addition, the corresponding author must sign statements on 3.) NIH Funding and 5.) Acknowledgments, if applicable. This form is available online at <http://www.editorialmanager.com/annallergy>.

Tables

It is a requirement that tables be prepared using Microsoft Word. Tables should be uploaded as a separate submission item, be numbered in the order in which they are first cited in the text with superscript Arabic numerals, and recorded during the electronic submission process. Each table should have a concise heading that makes it comprehensible without reference to the text of the article. Use horizontal lines only at the top and bottom of the table and between column headings and the body of the table. Use no vertical lines. Explain any nonstandard abbreviations in alphabetical order in a footnote to the table, e.g., Abbreviations: CT, computed tomography; MRI, magnetic resonance imaging; OR, odds ratio.

Figures

Figures (graphs, charts, photographs, and illustrations) should be numbered in the order in which they are first cited in the text and recorded during the electronic submission process. It is a requirement that graphics be prepared using a program which can save files in a format that can ultimately be saved and submitted as EPS or TIFF. **Figures should not be embedded within the manuscript text file, but submitted as separate EPS or TIFF files.** Graphics should be

saved in CMYK (cyan, magenta, yellow, black) rather than RGB (red, green, blue). **A figure legend for each graph, chart, photograph, and illustration should be uploaded during the electronic submission process as a “Figure Legend” submission item.**

The Artwork Quality Check (Artwork QC) feature in Editorial Manager is designed to inform authors whether an uploaded figure file is acceptable for production. At the time of submission, the author must view the Artwork Quality Results. If our automated system warns us that one or more of your figures are not of publication quality, the manuscript will be considered for peer review. If the article, however, is accepted, publication will be contingent upon you providing the editorial office with figures which pass the artwork quality check program.

Image Editing Applications

Adobe Photoshop TIFF & EPS Corel Photo-Paint TIFF & EPS.

Drawing Applications

Adobe Illustrator TIFF & EPS

CorelDRAW TIFF & EPS

Deneba Canvas TIFF & EPS

Macromedia Freehand TIFF & EPS

Resolution Reminders

Line art should be created at 1200 dpi and saved in a bitmap/monochrome color mode. Gray halftones should be created at 300 dpi and saved in grayscale color mode. Color halftones should be created at 300 dpi and saved in CMYK color mode. Combination halftones should be created at 600 dpi and saved as either CMYK or grayscale color modes. **Please Note:** An image should be saved and submitted in the size at which it will be printed. For optimal results, scaling, rotation, and cropping should be done using an image editing program, rather than a page layout program.

Assembled Artwork

There are a few essential items that should be checked prior to submitting an assembled figure:

- Check the final size to ensure that it will fit within the designated column width
- Check the final image for proper gutter spaces/tooling
- Check for proper placement of labels (if applicable)
- Check to ensure straightness of figure
- Check for proper resolution
- Check for proper color mode

The resolution specification for TIFF and EPS files is 1200 dpi for monochrome, figures that are black and white only and line shots; 300 dpi for gray/ CMYK or color photographs, and 600 dpi for combinations, such as photographs labeled with letters or other markings. **For additional information on submitting graphics, please visit the Cadmus website at <http://art.cadmus.com/da/guidelines.jsp>.**

CME Questions

CME Review articles, offered as part of a Continuing Medical Education endeavor, must include a minimum of 5 multiple-part questions, with five answers each, related to the material in the review article. These questions should be uploaded as a separate submission item.

Disclosure of Faculty Interests or Affiliation Form(s)

In addition to Authorship forms, CME Review articles require all authors read and sign an original Disclosure of Faculty Interests of Affiliations form at the time of submission. This form is available online at <http://www.editorialmanager.com/annallergy/> and should be uploaded as a separate submission item.

Honorarium Form

Upon publication of a CME Review article, the *Annals* offers a \$1,000.00 honorarium. This form is available online at <http://www.editorialmanager.com/annallergy/> and should be uploaded as a separate submission item.

Letter of Permission

If your article contains previously published figures or tables, a letter of permission from the copyright holder should be uploaded as a separate submission item.

Manuscript Checklist

Please read and check off the relevant items listed on the checklist as you prepare your manuscript. This form can also be found on the manuscript login site.

Manuscript Checklist

Please read and check off the relevant items listed on the checklist as you prepare your manuscript.

- Review full manuscript submission instructions on our Web-based submission and review system at <http://www.editorialmanager.com/annallergy/>.
- Manuscript should be in a standard font such as Times New Roman or Courier, size 12. Each manuscript component should be attached as a separate submission item, begin on a new page, be double-spaced and have a one inch margin on all sides. Page numbering should begin with the manuscript file. The page number should appear in the upper right corner of each page. Line numbers (i.e., 1, 2, 3 etc.) should be displayed in the left-hand margin of the manuscript file. Abstract, author identifying information, references, and figure legends should not be included in this file.
- On the title page, designate a corresponding author and provide a complete mailing address, telephone number, fax number, and e-mail address. Provide first and last names, abbreviated-highest academic degree, e-mail addresses, and institutional affiliations for any coauthors. Identify all financial support for the research and the work. Include a word count for text only (excluding tables footnotes and figure legends) and the number of figures and tables accompanying the manuscript. If appropriate, include Clinical Trial database and registration number and if there are more than 5 authors, substantiate the contribution of each author.
- Provide an abstract that conforms to the structured abstract format.
- Provide a minimum of 3 key words or short phrases that capture the main topics of the article.
- Include the following section headings for Text: Introduction, Methods, Results, and Discussion. If appropriate, include information on institutional review board/ethics committee approval or waiver and informed consent in the Methods section.
- Include in Acknowledgements the names, affiliations, and specific contributions of all persons who have contributed to the work reported in the manuscript but do not meet authorship criteria.
- Check all references for accuracy and completeness. Put references in proper format in numerical order, making certain that each is cited in sequence in the text.
- Include a brief title (no longer than 10 to 15 words) for each table and figure and a succinct, explanatory legend for each figure.
- Have all authors read and sign an Authorship Form. Each form should be uploaded as a separate submission item at the time of submission. This form is available online at <http://www.editorialmanager.com/annallergy/>.
- If this is a CME review article, each author will need to read and sign a Disclosure of Faculty Interests or Affiliations” form. Each form should be uploaded as a separate submission item at the time of submission. The corresponding author should also read, sign and upload the Honorarium form as a separate submission file during the submission process
