COPYRIGHT RELEASE AND AUTHOR AGREEMENT

Manuscript Number: NEU-D-________-_______________

Manuscript Title: ______________________________________

In consideration of the editor’s and publisher’s expense and effort in reviewing, editing and publishing my/our Manuscript, and of the professional benefits related to its publication, I hereby transfer, assign, and otherwise convey to the Congress of Neurological Surgeons upon acceptance of the manuscript by NEUROSURGERY all rights, title, and interest in the Manuscript, including copyright ownership, together with full right and authority to publish the Manuscript (including accompanying digital supplementary content) in all forms and media and to claim worldwide copyright for that published Manuscript. (For authors who are employed by the U.S. government, this provision applies only to the extent that the Manuscript is copyrightable.)

To the best of my knowledge and conviction:

Each of the undersigned is an author of the Manuscript and all authors are named on this document.

The content of the Manuscript, all or in part, has not been published and is not being considered for publication:

☐ in any form. ☐ except as described on the attached page(s). ☐ except as disclosed in the Manuscript on page(s) ____.

All intellectual contributions, technical help, financial or material support, and all financial or other relationships that may constitute or lead to a conflict of interest have been acknowledged or disclosed in the Manuscript:

☐ with no exceptions. ☐ except as described on the attached page(s).

The Manuscript is not subject to copyright or other rights except my own to be transferred upon its publication.

DISCLAIMER: The lead author warrants on behalf of each co-author that this Work contains no libelous or unlawful statements and does not infringe on the rights of others. If excerpts (e.g., text, figures, tables, illustrations, or audio/video files) from copyrighted works are included, a written release will be secured by the authors prior to submission, and credit to the original publication will be properly acknowledged. The lead author further warrants on behalf of each co-author that he or she has obtained, prior to submission, written releases from patients whose names or likenesses are submitted as part of the Work. Should the Editor or LWW request copies of such written releases, authors shall provide them in a timely manner.

Author(s) Posting of Articles to an Institutional Repository

NEUROSURGERY will permit the author(s) to deposit for display a “post-print” (the final manuscript after peer-review and acceptance for publication but prior to the publisher’s copyediting, design, formatting, and other services) 12 months after publication of the final article on his/her personal web site, university’s institutional repository or employer’s intranet, subject to the following:

• You may only deposit the post-print.
• You may not update the post-print text or replace it with a proof or with the final published version.
• You may not include the post-print or any other version of the article in any commercial site or in any repository owned or operated by any third party. For authors of articles based on research funded by NIH, Wellcome Trust, HHMI, or other funding agency, see below for the services that LWW will provide on your behalf to comply with “Public Access Policy” guidelines.
• You may not display the post-print until twelve months after publication of the final article.
• You must attach the following notice to the post-print: “This is a non-final version of an article published in final form in (provide complete journal citation).”
• You shall provide a link in the post-print to the NEUROSURGERY web site.
**Public Access Policy** Funding Disclosure

Please disclose below if you have received funding for research on which your article is based from any of the following organizations:

National Institutes of Health (NIH)
Wellcome Trust
Howard Hughes Medical Institute (HHMI)
Other: Please List

Compliance with NIH and other Research Funding Agency Accessibility Requirements

A number of research funding agencies now require or request authors to submit the post-print (the article after peer review and acceptance but not the final published article) to a repository that is accessible online by all without charge. Within medical research, three funding agencies in particular have announced such policies:

- The U.S. National Institutes of Health (NIH) requires authors to deposit post-prints based on NIH-funded research in its repository PubMed Central (PMC) within twelve months after publication of the final article in the journal.
- The Howard Hughes Medical Institute (HHMI) requires as a condition of research grants, deposit in PMC, but in its case within six months after publication of the final article.
- The Wellcome Trust requires, as a condition of research grants, deposit in UK PubMed Central within six months after publication of the final article.

As a service to our authors, LWW will identify to National Library of Medicine (NLM) articles that require deposit. This Copyright Transfer Agreement provides the mechanism for identifying such articles. LWW will transmit the post-print of an article based on research funded in whole or in part by one or more of these three agencies to PubMed Central.

Upon NIH request, it remains the legal responsibility of the author(s) to confirm with NIH the provenance of their manuscript for purposes of deposit.

Author(s) will not deposit their articles themselves.

Author(s) will not alter the post-print already transmitted to NIH.

Author(s) will not authorize the display of the post-print prior to:

(a) 12 months following publication of the final article, in the case of NIH.
(b) 6 months following publication of the final article, in the case of Wellcome Trust and HHMI

**I certify that:**

I have read the version of the Manuscript to be published and reviewed the data on which it is based. I have made a substantial contribution to the medical/scientific/intellectual content of the Manuscript and on that basis agree to be named as an author. I approve the Manuscript for publication and will take public responsibility for its content. Upon acceptance of the article for publication I will promptly remove any prior versions of this work (normally a preprint) that may have been posted to an electronic server.

Congress of Neurological Surgeons

Disclosure Statement

I hereby certify that, to the best of my knowledge, no aspect of my personal or professional circumstances currently, or in the past 12 months, places me in the position of having a conflict of interest with any interest of the organization relating to this educational activity.

I hereby certify that, to the best of my knowledge, neither I (including any member of my immediate family) nor any individual or entity with whom or with which I have a significant working relationship have (has) received something of value from a commercial party related directly or indirectly to the subject of this article.

☐ The foregoing statements are true without exception.

☐ The foregoing statements are true except as reported in detail below.

Affiliations: Please list.

Company/Institution with which author has interest

Type of Affiliation
- Stockholder
- Consultant
- Honorarium
- Grants
- Other Financial or Material Support

Unlabeled Uses of Products:

When an unlabeled use of a commercial product, or an investigational use not yet approved for any purpose is discussed during an educational activity, the presenter is required to disclose that the product is not labeled for the use under discussion or that the product is still investigational. Discussion of unlabeled uses:

☐ Yes ☐ Not Applicable

Generic and Trade Names:

Articles must give a balanced view of therapeutic options. Authors’ use of generic names will contribute to this impartiality. If trade names are used, those of several companies should be used rather than only that of a single support company.

Corresponding Author’s Signature: ___________________________ Date: ____________

It is each author’s responsibility to disclose in the article, any commercial support related directly or indirectly to the subject of their article. It is also each author’s responsibility to include the Food and Drug Administration clearance status of any device or drug requiring FDA approval discussed or described in their presentation or to describe the lack of FDA clearance for any “off label” uses discussed.
